

Nordic Systems AS - Slim AI Opportunity Canvas

Complete only these six fields. Short phrases are enough. · AI in Industry and Business · USN Campus Kongsberg · 14 August 2026

Team: _____

Challenge: _____

1 · USER, PROBLEM, AND BASELINE

Who experiences the problem? What task or decision is difficult today? What do we know about current time, quality, cost, safety, or experience?

[illegible]

2 · AI ROLE

- ☐ **Assist** — retrieve, summarize, classify, or draft; a human checks and completes.
- ☐ **Recommend** — propose options and evidence; a human decides and owns the decision.
- ☐ **Limited action** — act only within narrow, reversible, pre-approved limits.
- ☐ **No AI yet** — improve the process or data first.

What exactly will the AI do — and not do?

3 · PERMITTED SOURCES AND EXCLUSIONS

Which data or documents may be used? Which information, people, decisions, or actions are excluded?

4 · VALUE AND MEASURE

For [user], when [situation], AI will [role], which should improve [one measurable outcome]. Baseline or first measurement needed:

[illegible]

5 · HUMAN OWNER AND CHECK

Who checks the result? What must they verify? Who approves, overrides, and remains accountable?

6 · SMALLEST USEFUL TEST AND STOP SIGNAL

What is the smallest test that could show useful evidence? What one result or incident would make the team pause immediately?
